Acclaim's vision is to be the Home Care of choice for the future, embracing all the backgrounds within a multicultural environment. We accomplish this by providing a suitable plan of care for each individual patient, helping them adjust to their home after hospitalization or rehab stay. By using the continuity of primary nursing, our patients are well cared for from the very beginning to the end of discharge.

Our sense of community allows Acclaim to continually leverage the resources around the patient so they may remain independent in their home, while educating them how to cope with their health issues. Through our dedicated staff and daily patient review meetings, our team keeps up-to-date on all issues pertaining to our patient's care and needs. It is because of our enduring commitment and well-managed assisted care that we envision this future by being the first choice for home healthcare.

“The nurse I had was so well informed as I was a very sick person. She healed my wounds and helped me mentally. I told her she was an angel sent down to help me. Due to her efforts, I am feeling good now and my family is truly grateful that she was sent to help me. I miss her and I have told all my friends how great she treated me.”
